MANIFESTO

WE ARE RVR,

RaVeRs. RêVeRs. pRoVocaR. suRviVoR. ReVeRie. RéVolteR. irReVeRent. ReVolucionaR. foReVeR.

RVR is energy **you can't fake**. It's underground, raw, and unapologetic.

It's the pulse in the crowd, the beat in your chest, the moments that hit harder than a bassline.

Every event, every drop, every thread of fashion carries RVR charge: Durability, quality, and substance over fluff.

We build things that last with intention and with fire. The goal is to create a brand that consistently delivers meaningful cultural engagement.

MAUS NFTs are your gateway. RVR token is your power.

Claim your space. Use your voice. **OWN IT,**

WHY THE XRPL

XRPL moves at **lightning speed**. Fees are almost nothing, and the network never chokes – **built for real-world scale**.

It's secure, efficient, and battle-tested. Fast money, fast moves, fast culture.

This is the chain for action, not delays. Energy flows where it belongs, and nothing slows it down. You wanna argue with me? opps! You can't argue with a whitepaper!

. 1,500 Transactions Per Second (TPS):

. The minimum transaction cost on XRPL is 10 drops (0.00001 XRP), scaling with network load. even during high congestion, fees remain minimal, making microtransactions feasible and cost-effective.

. XRPL's design allows for high scalability without compromising on decentralization or security. Its consensus algorithm enables efficient validation of transactions, supporting the growth of applications.

. Proven Adoption: As of Q3 2025, XRP's circulating market cap has increased by 392.6% year-over-year, reflecting growing confidence and adoption in the network.

THE MARKET PULSE

Portugal's nightlife industry is one of Southern Europe's strongest cultural and financial engines. Clubs, raves, and festivals generate over **€1.5 billion annually in direct and indirect revenue, with consistent 4–6% year-over-year growth.**

Lisbon, Porto, and Algarve remain the core markets, driven by both tourism and local demand.

Key data points:

Tourism crossover: More than 4 million annual visitors participate in nightlife events, each spending an average of €80–€120 per night.

Margins: Average profit margins for medium-sized events range between 25 – 40%, with high-volume venues surpassing 50%.

Ticket tiers: Entry prices typically span €15 – €50, while VIP and branded events exceed €100, supporting scalable, predictable revenue.

Reinvestment cycle: Event profits recycle quickly into new productions, marketing, and collaborations – an ideal loop for RVR model.

THE VISION

RVR bridges the digital and real worlds through art, music, and fashion – creating a brand that moves people both on-chain and off, bringing them all together.

We invest in three core pillars that define our mission:

- . **Digital Art:** the MAUS NFT Collection – the creative foundation and digital heartbeat of RVR.
- . **Music Events:** authentic, high-energy events that bring music back to its roots and connect real crowds to web3.
- . **Fashion:** the materialization of RVR's emotion and energy – wearable culture built with intention, quality, and identity.

Short-term, we start by building the community through the MAUS Collection and the RVR Token.

Mid-term, we connect all pillars – merging NFTs, music, and fashion into one interactive economy.

Long-term, we become a self-sustaining ecosystem that redefines how digital assets power real experiences. Built to last. Driven by the crowd. Made for the culture.

RVR IS FOREVER

RVR MUSIC EVENTS

RVR Music Events put music back at the center, where it belongs.

No more endless selfies for Instagram, no gimmicks, no boring giveaways that distract from the beat, or sponsors looking for our money.

The focus is pure: sound, energy, and shared experience.

Only 3 to 5 events per year – each carefully timed and designed to provoke demand while keeping the underground feel alive. Scarcity ensures every night is special and fully immersive.

MAUS holders gain priority access, VIP perks, and profit shares.

Tickets and experiences are purchased through **RVR Tokens** (beside Euro or USD), creating a full loop between the digital ecosystem and real-world participation.

Every RVR Music Event is a statement: music first, culture intact, and community central.

These are not typical nights – they are RVR experiences, connecting holders, artists, and fans in a pulse that **extends beyond the dancefloor.**

RVR FASHION

RVR Fashion rejects the throwaway cycle.

RVR Fashion is the RVR state of mind made tangible.

We build **slow, sustainable, local and quality-driven** pieces that hold meaning. Every stitch, every fabric, every release is built to last and to be worn with conviction.

Our materials are natural, ethical, and sustainable, sourced to minimize environmental impact while maximizing durability and quality.

RVR Fashion drops are limited, available first to MAUS and RVR holders, but open to anyone who lives for art, music, and cultural underground expression.

RVR Fasion is not merch. It's cultural fashion design — pieces made to be recognized everywhere.

Quality over quantity. **SUBSTANCE OVER TREND**. Always. foReVeR.

RVR META CLUBS

RVR Metaclubs connect the real and digital worlds – a seamless bridge between physical dance floors and metaverse stages.

Built inside XSpectar, these hubs host music events, art exhibitions, fashion showcases, and community gatherings – all carrying RVR's signature atmosphere.

The metaverse becomes a **new stage for tourism:** cultural showcases, hybrid events, and virtual summits that highlight real-world experiences and transform them into immersive, unforgettable moments.

For the tourism industry, this opens an entirely new layer of visibility and engagement – immersive, global, and measurable. Brands can extend their presence into digital space, turning metaverse events into gateways for real engagement.

Event producers can host virtual showcases, team-building experiences, and hybrid gatherings that connect clients, companies, and global audiences.

RVR Metaclubs fuse tourism and technology.. The dance floor doesn't stop. **IT EXPANDS!**

THE DROP - MAUS NFT COLLECTION

MAUS is the heartbeat of RVR – Your digital identity inside the RVR world.

A collection of **4,069 MAUS NFTs** designed to merge art, culture, and finance – **BOLD, ALIVE AND FUTURE-READY.**

Supply: 4069 NFTs

Dynamic NFTs: 15 Dynamic NFTs that holders can fully customize with attributes of the collection.

Unique 1:1s: 20 completely one-of-a-kind MAUS NFTs.

Supreme: 13 animated MAUS – awarded to the first 13 holders of 60 MAUS each – or the top 13 collectors at mint-out.

Royalties: 7% [1.5% to Team, 2.5% to Community Wallet, 2.5% to Project Fund, 0.5% to Gold MAUS]

Owning a MAUS comes with real utility: RVR token airdrops, DAO voting rights, access to IRL music events, fashion drops, and metaverse experiences.

MAUS makes NFTs **tangible, social, and valuable beyond the screen.**

It's digital identity with purpose, turning the XRPL into a lifestyle movement

Not just a mint – it's something you are **PROUD TO OWN,**

RVR TOKEN

RVR Token is the fuel that powers the entire ecosystem — enabling participation across RVR.

Holders use RVR to buy Dynamic Attributes, tickets to our events, fashion drops, or to stake and earn more RVR through the ecosystem.

How It Works:

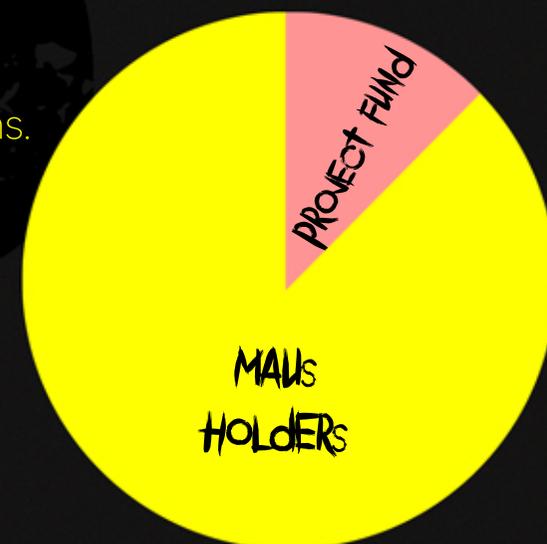

- . Utility drives demand: the more RVR Tokens are used across digital and IRL experiences, the greater their visibility and circulation.
- . Every RVR experience — events, fashion releases, or ecosystem participation — fuels token activity and engagement.

For MAUS Holders:

- . 90% of the supply goes to MAUS NFT holders through different mechanisms.
- . 10% is locked for project development.
- . No public sales, no team allocation, fair launch to all MAUS Holders.

Governance Power:

- . Each RVR Token gives DAO voting rights.
- . More tokens mean more Power in community decisions.

GOVERNANCE

RVR runs on community power. How it works:

Dual Power:

MAUS NFTs grant identity and access.

RVR Tokens grant voting weight. Together, they shape direction and value.

RVR Power:

MAUS holders receive RVR token airdrops.

RVR token = voting strength. The more you hold and engage, the stronger your influence.

Proposals:

Holders vote on key moves – event locations, fashion collaborations, partnerships, treasury use, and creative direction.

Execution:

Once approved by the DAO, decisions move straight into production. No middlemen.

OWN THE CULTURE, SHAPE THE MOVEMENT,

TOKENOMICS

RVR moves with the community who power it.

No public sales, no team bags, no hidden wallets – just real distribution with real purpose.

MAUS holders stand at the core, with RVR Tokens unlocking both governance and utility across the ecosystem.

Supply: 500M

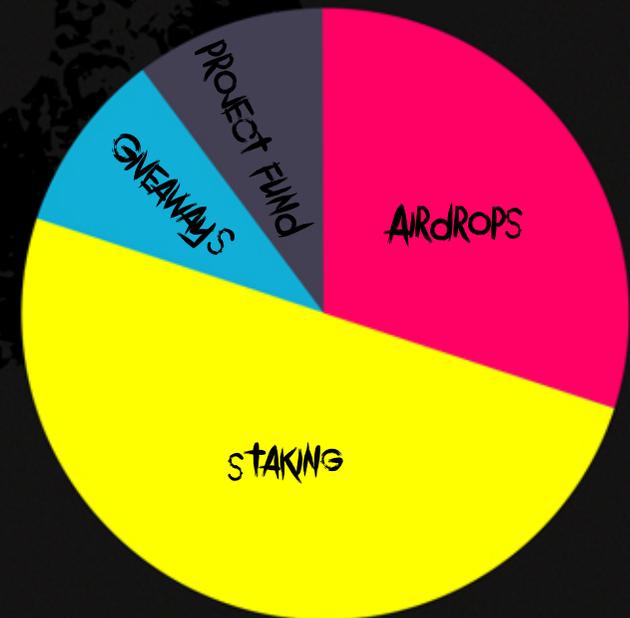

Distribution:

30% → Community Airdrops (2 drops as roadmap milestones are reached)

50% → Staking Rewards

10% → Giveaways & Incentives (community events)

10% → Project Fund (locked for future development)

**BUILT FOR HOLDERS!
BUILT TO LAST!**

The RVR **DAO is the community engine** – a structure that gives real power to the community.

As a **Decentralized Autonomous Organization**, decisions are made collectively, not hierarchically.

Participation: MAUS NFT holders receive RVR Tokens, granting them access to governance. Holding RVR means having a voice in every key move – from event production to treasury decisions.

Voting Power: The more RVR you hold, the stronger your voting weight. Your involvement directly influences how funds are allocated, which projects move forward, and how RVR expands both digitally and IRL.

Scope: Decisions cover event production, partnerships, treasury allocation, venues, design, and ecosystem development.

For holders and investors, the DAO transforms passive ownership into active influence. Instead of watching a company make decisions, **you are the company** – shaping its roadmap and identity.

The **DAO turns holders into decision-makers**. It gives every investor a seat at the table.

COMMUNITY REWARDS

RVR plays clean – fully compliant under corporate and tax law.

Legal Agreement:

Rewards distribution follows a **Master Agreement** (MA) signed by the RVR company:

- . Outlines how MAUS NFT holders may receive **event-and activity-based rewards** (based on snapshots).
- . The MA is public – pinned on our website.
- . Holding a MAUS NFT makes you eligible for rewards under the terms of the agreement.

How It Works:

- . Engagement snapshots are taken from community activities and events.
- . Rewards are distributed in **XRP**.
- . Distributions are structured as **contractual, engagement-and event-based rewards** – fully auditable, transparent, and legally documented on the XRPL.

For MAUS Holders:

- . Rewards celebrate **community participation and engagement**.
- . The more MAUS holders engage with the community, the more XP they earn, which can increase their chances of receiving event-based rewards.
- . MAUS remains a **collectible and digital identity**, with occasional event-and activity-based rewards

LEGAL AND COMPLIANCE

Utility, Not Security:

- . The **RVR Token** functions purely as a utility token – used for event access, purchasing dynamic attributes, and participating in the ecosystem.
- . It carries **no dividends or investment guarantees**.
- . Holders can stake or trade RVR Tokens, or redeem them for exclusive RVR and MAUS products.
- . MAUS NFTs are collectibles and digital identities, not securities.

Payment Flow & Reward Distribution:

- . **Engagement-based rewards** from the RVR ecosystem are distributed according to the MA
- . MAUS NFT holders earn **XP** through participation in community and ecosystem activities.
- . **The more XP** a holder earns, **the greater the opportunity** to receive event- and activity-based rewards.
- . Rewards are distributed in XRP and are fully **auditable and transparent on the XRP Ledger**.
- . Payouts are classified as **engagement-based rewards**, not dividends or investment returns, ensuring compliance with applicable crypto and tax regulations.

KYC & AML:

- . All payouts are **auditable and tracked on the XRP Ledger**, ensuring full transparency.
- . **Large payouts will be split into multiple transactions** to ensure proper tracking and oversight.
- . **10% of the total supply** is reserved for future project development.

RVR ROADMAP

PARTNERSHIP — OPULX NFT MARKETPLACE

RVR partners with OpulX NFT Marketplace, the next-gen XRPL marketplace built for creators, networks, and high-velocity drops — pushing digital ownership forward.

MAUS NFT **minting** and **staking** run on OpulX's infrastructure, ensuring smooth access, verified authenticity, and real XRPL reach.

For **MAUS** and **RVR holders**, this partnership means stronger visibility, scalability, and credibility across the XRPL ecosystem.

Culture meets infrastructure. **Creativity meets liquidity.**

Bottom line:

RVR builds the movement. OpulX NFT Marketplace powers the engine.

TOGETHER, WE PUSH WEB3 CULTURE INTO OVERDRIVE.

ABOUT THE FOUNDER

spectrum108 – creator since 2005, NFT collector, XRPL investor and community member since 2021. An artist shaped by music, image, and motion – from photography and 3D to music videos and fashion visuals.

Pushing new visuals onto the XRP Ledger, shaping creativity into culture. RVR is where **art, music, finance, and web3 pulse together.**

FINAL WORDS

RVR is culture, amplified – built for the underground, powered by the blockchain.

- . **MAUS holders move first.** Hold to earn RVR Tokens.
- . **RVR Tokens fuel the system** – staking, rewards, and real influence.
- . The **DAO** turns holders into decision-makers.
- . **Event and Activity-based rewards** give holders the chance to enjoy special perks.
- . **Metaclubs bridge real life and digital energy** – where music, art, business, and community collide.
- . **Music** shapes what we are.
- . **Fashion** turns the RVR mindset into **wearable identity**.

WE ARE RVR - WE ARE RVR - WE ARE RVR

We Are a movement built on art, music, finance and connections.

Owned by its **community**, powered by **utility** and designed to last **foReVeR**.

JOIN THE MOVEMENT
